

Mobile Broadband Antenna

The MVDP100X5 broadband antenna is designed to be used with military, private or commercial applications where reliability is needed most. This antenna works with all radios within the 100-512 MHz band.

The antenna has a band pass covering 100-512 MHz with a single input, at a power level of 75 Watts. A VSWR of less than 2.5:1 throughout most of the band provides an efficient match to all modern military transceivers.

Being “ground independent”, this antenna can be used on all types of vehicles (metal or non-metal) with no degradation in performance.

Robust and tough, this antenna is housed in a thick fiberglass radome and is constructed from corrosion resistant materials for reliability in the harshest environments.
